

RKDF University

Program Outcomes, Program Specific Outcomes and Course Outcomes

Faculty of Library & Information Sciences

Bachelor of Library & Information Sciences (B. Lib)

Programme Outcome (POs)

- PO1.** Students enhance the skills of organizing information and recorded knowledge.
- PO2.** Students will identify the recent trends in dissemination of information.
- PO3.** Students will develop the professional competencies for LIS and related field.

PROGRAMME SPECIFIC OUTCOMES:

- PSO1.** Students can apply the skills and attitudes of visioning, entrepreneurship, advocacy, planning and management of Libraries and Information Centres (LICs) and effective leadership in the LIS field.
- PSO2.** Students will possess the skills to respect, engage and collaborate with a diverse community in order to advocate for and construct inclusive, meaningful, and participatory library services, programmes and resources.
- PSO3.** Students can perform and access research based practices through the application of information literacy, inquiry, and research methods including data discovery, analytics and qualitative measures.

COURSE OUTCOME

FOUNDATION OF LIBRARY & INFORMATIONSCIENCE-BLS- 101

- CO 1:** After completion of this course, the student will be in a position to understand the definition, history and purpose of the library. The students will be in a position to draft library legislation for a state. Further, they will be aware of the role of professional associations and the standard professional ethics of librarianship.

MANAGEMENT OF LIBRARIES & INFORMATION CENTRES-BLS- 102

CO 1: After completion of this course, the student will be in a position to understand the basics of management and how management principles are applied in library management. Further, they will have the ability to perform the basic housekeeping operations, prepare budget documents and perform the stock verification. They will be acquainted with the basics of collection management and Human resource management.

KNOWLEDGE, ORGANISATION AND PROCESSING- BLS- 103

CO 1: The outcome of this course is that the student after completion of the course will be in a position to understand the basic concept of organization of knowledge. They will be able to differentiate between the various library classification schemes. Further, they will have an understanding of the theoretical foundation of the purpose, features and types of library catalogues.

KNOWLEDGE, ORGANISATION AND PROCESSING-BLS-104

CO 1: After completion of the course, the student will be in a position to build the classification numbers after the subject analysis of documents using the Colon Classification scheme and Dether, they will be aware of classifying documents having simple, compound and complex subjects.

KNOWLEDGE, ORGANISATION AND PROCESSING- BLS- 105

CO 1: After completion of this course the student will be in a position to prepare various catalogue entries for simple, complex, various authorships, editorial publications, serial publications and corporate body authored documents. Further, they will be able to prepare catalogue entries for non-print materials.

DOCUMENTATION AND INFORMATION RETRIEVAL-BLS- 106

CO 1: After completion of this course, the student will be in a position to understand the intricacies of an information retrieval system. The paper further aims to build the Further, they will have the ability to evaluate and prepare effective search statements to retrieve information from information retrieval systems. They will be acquainted with the concept of an index, indexing languages, vocabulary control and the semantic web.

INFORMATION TECHNOLOGY: BASIC BLS- 107

CO 1: The outcome of this course is that the student after completion of the course will be in a position to understand the basics of information communication and technology relevant to librarianship and information management. Further, they will be aware of the latest technological advancements in the field of ICT such as databases, search engines and the Internet.

REFERENCE SERVICE AND SOURCES OF INFORMATION-BLS- 108

CO 1: After completion of this course, the student will be in a position to understand the definition, purpose and types of libraries with their distinct functions and services. Further, they will be aware of the emerging trends in library organization and services. The broad range of information sources and services available in various subject areas. Further, they will have the ability to evaluate and suggest authentic and useful information sources to library users. They will be having expertise in providing reference services to users of a library

Master of Library & Information Sciences (M. Lib)

Programme Outcome (POs)

- PO1.** Students will get technological knowledge about library automation and Digital Library Services
- PO2.** Students will effectively administer and manage Libraries and Information Centers.
- PO3.** Students will enhance their skill for generating new knowledge through research.
- PO4.** Student will be enriched in human values, professional skills and ethics.

PROGRAMME SPECIFIC OUTCOMES:

- PSO1.** Students can manage information resources and the information life-cycle through the processes of collection development, organization, preservation, curation, access, and dissemination in accordance with physical, virtual, and technical infrastructure and needs.
- PSO2** Students can design and implement policies essential for creating and providing information services and resources guided by the values of patron privacy, equitable access, intellectual freedom, and ethical use of information.
- PSO3** Students can perform and access research based practices through the application of information literacy, inquiry, and research methods including data discovery, analytics and qualitative measures

Course outcome:

UNIVERSE OF SUBJECTS & RESEARCH METHODOLOGY-MLS-201

CO 1 On successful completion of the course, to learn about the research methods, statistical techniques and their application in LIS.to ascertain research support tools and research communication process; learn various tools for data collection and data analysis. Learn how to write the research report. Understanding of research necessary for careers as information professional sat par with global level.

ADVANCED LIBRARY ORGANISATION AND MANAGEMENT-MLS-202

CO 1 On successful completion of the course, Students understood management principles and other cross-disciplinary perspectives to develop best practices in library and information centers. Understood the system of charging and discharging Acquire knowledge on HRD, Budget, planning and their relationship to the library environment Acquire knowledge to manage the information resources, including information acquisition, management, dissemination, organization and preservation. Able to facilitate the variety of audiences.

INFORMATION PROCESSING AND RETRIEVAL SYSTEMS-MLS-203

CO 1 On successful completion of the course, to learn the knowledge on various sources and services provided by library, to understand the reference sources; Institutional Repository, Web OPAC, Online Databases, and Citation databases, to learn the context of various information services, provide by the library, to understand various national information systems and their role in creation, organization, dissemination and preservation of information. To work with Web 2.0 technologies such as RSS, blogs and wikis.

INFORMATION COMMUNICATION AND SOCIETY-MLS-204

CO 1 On successful completion of the course, students familiar with consortia in different levels and subjects. Attained knowledge of Library Networks. Enable the students obtained knowledge about online databases, and resource sharing. Gained knowledge in resource sharing techniques and procedures.to make the students aware with the latest developments and trends in the field of Resource sharing

INFORMATION SOURCES, SYSTEMS AND PROGRAMME-MLS-205

CO 1 After completion of this course, the student will be in a position to understand the broad range of information sources and services available in various subject areas. Further, they will have the ability to evaluate and suggest authentic and useful information sources to library users. They will be having expertise in providing reference services to users of a library

CO 2 Understand, identify and explore the different types of information sources.Evaluate various types of information sources. Explore, collate and

facilitate access to the electronic resources, such as e-journals, e-books, databases and institutional repositories. Provide library services using sources such as blogs, portals, wikies, subject gateways, digital libraries. Understand the concept of library resource sharing and consortia . Comprehend the nature and functions of various information systems and networks

INFORMATIONTECHNOLOGY:APPLICATIONS-MLS-206

CO 1 On successful completion of the course Students will attain knowledge of computer hardware and software. Students will attain an understanding encoding standards of computer. Students will understand the importance of operating system. Students will understand various computer network and different types of browser. Students can create and use Multimedia tools, spread sheets, Charts and graphs.

INFORMATION INSTITUTIONS, PRODUCTS ANDSERVICES-MLS-207

CO 1 On successful completion of the course, to deeply gained knowledge about information sources (print & electronic).to Determine types and Forms of information sources.to gained knowledge in databases for information sources. Identify and uses Internet information sources.to develop evaluation and practical skills in dealing with information sources.
