Area of Expertise (100 words)			
With over 17 years of academic and research experience, I specialize in power electronics, renewable energy systems, and hybrid energy solutions. My expertise includes designing and optimizing power converters, inverters, and multi-input DC-DC converters for efficient energy management. I have extensive experience in integrating wind and solar energy, electric vehicle technology, and smart grid applications. My research also focuses on harmonic reduction techniques, energy storage solutions, and AI-driven control systems. I have contributed to numerous research publications, patents, and industry collaborations in sustainable energy systems.
